DETAILED ACTION

1. Acknowledgement is made of the amendment received on March 13, 2009.

Allowable Subject Matter

2. Claims 1-12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The applicant has amended the independent claims 1 and 7 to include that each of the two mobile receivers has a dedicated antenna, with both receivers being connected to a common correlator. One of the receivers has a better communication link with the base station than the other receiver does. The received signals from both receivers are correlated in the correlator. Some of the correlated signals are selected to generate a replica of unwanted signals which is removed from the received signal of less quality. The claims 1 and 7 are amended to specifically indicate that the two receivers are at different locations.

The closest prior art, Kwon et al (US 7,359,431) in view of Bousquet et al (US 6,650,906) shows a similar system which also includes two received signals connected to a correlator to identify noise signals to be removed. But in Kwon's disclosure, only one of the received signals is from an antenna, the other signal is a pseudo random number generated locally. In the instant application, the two received signals are from the same base station, and

the two receivers are at different locations, with one location being able to receive good quality signals from the base station. The above mentioned distinct features in both claims 1 and 7 render the two claims allowable.

Claims 2-6 are depending on claim 1 and claims 8-12 are depending on claim 7. The dependent claims are further limiting the independent claims. Therefore claims 1-12 are allowable.
